

Case Study

JIT & Production Sequencing

Our client supplies five products to a manufacturer of injection molding machines. In order to remain a viable supplier, our client needed to rectify dismal fill rates and on-time performance.

They achieved this by consolidating the five products (manufactured at 5 separate plants) into a single draw-down point for their client, housed at Kenakore's Supply Chain Logistics Center.

Kenakore's Supply Chain Logistics Center solved their challenges with **JIT & Production Sequencing**.

RESULTS

- ✓ **100% fill rate**
- ✓ **Inbound audit and quality assurance at the Supply Chain Logistics Center**
- ✓ **Reduction in freight expense of over 50%**
- ✓ **JIT production scheduling**
- ✓ **Accurate materials**
- ✓ **Simplified scheduling**

Kenakore's Supply Chain Logistics Center housed the client's inventory and managed distribution according to our proven inventory model – which enables:

- » Real time reconciliation
- » 100% supply line visibility
- » Inventory accuracy
- » Reduced shrinkage and obsolescence
